FOREWORD

Daylilies can be relied upon for a wealth of bloom and masses of color in practically all types of soil and weather without the fuss and bother of combating insects and disease. In mid-summer, when bloom from other perennials is scarce, daylilies are at their peak. During and after mid-summer vacation neglect, the bright starlike flowers of *hemerocallis* are always there and waiting to greet you. Most reliable of all flowers "The Flower of Character".

Eminent plant breeders have made rapid progress in the development and improvement of *Hemerocallis*. The flowers are as large and beautiful as those of the finest bulb lillies. Established plants of some varieties have flowering scapes (stalks) with as many as fifty buds which open and flower over a two to six week period. Daylilies are now available in a wide range of colors, color patterns, heights and flower shapes. A proper selection of varieties will furnish bloom spring to frost. All varieties have the quality of facing their flowers outward to the light or open when planted near walls, shrubbery, etc.

Daylily uses are many and varied. They are equally at home in the perennial border, rock garden, foreground of shrubbery or evergreen plantings, near pools and along the banks of small streams. They require very little attention and are easy to grow and transplant. Their charm and beauty in the garden is creating many new daylily enthusiasts annually. Try a few this year. They are permanent and will be a pleasure for years.

SUGGESTIONS

The quarterly News Letters and beautiful year-book issued by the *Hemerocallis* Society are worth more than the \$3 annual dues. Write Geo. E. Lenington, Sec'y, The *Hemerocallis* Society, Box 139, Kansas City 10, Mo.

Kodachrome Slide Collections of Daylilies, Roses, Iris, Flower Arrangements, etc., can be rented from Philip Corliss, Box 68, Somerton, Ariz. His book "*Hemerocallis, The Perennial Supreme*" was issued in 1951.

DILL 1953 INTRODUCTIONS

FIFFI. Named in honor of Mrs. R. C. (Fiffi) Kline whose name is familiar to daylily lovers. She describes this daylily as "Having a character all its own". The monterey red coloring of the petals cuts off abruptly giving a circular effect to the cadmium yellow throat which is also the sepal color. Good bloomer on well branched scapes 2½ ft. high. Mid-season. Deciduous. 1953 Fall delivery to those promised. New orders cannot be accepted until next year. \$8.00.

HEMEROCALLIS

Our listing groups the various varieties in accordance with their blooming periods. Group No. 1 lists those that bloom first in Spring. Group No. 2 those that are starting to bloom as the first group finishes, etc. Blooming periods will vary to some extent under different conditions of sun, shade and moisture. Our manner of listing, should enable our customers to conveniently select varieties to obtain continuous bloom.

HARDINESS LINE: On a U. S. Map draw a line from the Northwest tip of the State of Oklahoma to Cleveland, Ohio and from Cleveland to Boston, Mass. Some varieties, usually with evergreen foliage, suffer injury and sometimes winter kill North of this line.

EVERGREEN refers to the foliage of varieties that remain evergreen throughout the winter in the far South. This class is less hardy North. North of the "Hardiness Line" they require good drainage Spring planting and winter mulching.

SPRING OR SUMMER TRANSPLANTING is recommended in localities North of the "Hardiness Line".

FIRST YEAR RESULTS: Early blooming varieties planted in Spring may fail to bloom until the following Spring. Do not judge any variety the first year as the performance with respect to flower size, color, plant height and branching are all below par.

PLANT DAYLILIES with bleached line on foliage at ground level, or with root crown approximately 1½ inches below surface.

MULCHING: A first winter mulch is desirable. The purpose is to protect the crown and the top soil a few inches around it from winter and early Spring thawing. Do not use soggy material. A nest of excelsior is good.

GUARANTEE: We use care to keep our plants true to name and are willing to replace, on proper proof, any found to be otherwise, but it is mutually agreed that in no case shall we be liable for more than the original cost.

MAIL ORDERS: On orders under \$3.00 please add 25c for packing and shipping. Missouri customers include sales tax.

PLANTS ARE SENT parcel post "Special handling" at no extra cost to you. This insures passenger train transit.

SPECIAL OFFER. Six \$3.00 varieties, all different, for \$15.00.
